Rell Sun Foundation Video  
Field Trip- Hawaiian Waters Park

#### Pre- Video Questions

- 1- Who does the Ocean belong to?  
Everyone.
- 2- Is it important to keep the ocean clean?  
Absolutely
- 3- Why is a clean ocean important to Tokelau / Hawaii?  
It's a part of who we are. It feeds us, gives us enjoyment, quality time, memories and a healthy lifestyle.

#### After video Questions

- 1- What new information did you learn?  
Always knew there was problems like pollution but never knew how bad it has become especially with things like plastic bags and how its affecting not just the sea life but us too.
- 2- Is it important for other people to know that?  
Absolutely! I was once 'other people', now I know and the more of us that know about it, the more of us can do our part to correct it.
- 3- What can you do to make our ocean safer?  
Anything and everything!!! Directly, we can clean up what trash we see and not make trash too. Indirectly, share this new found information with everyone who will listen. And for those who won't listen, tell them anyway, over and over again till they listen.

This day has been very educational. It makes me feel good about the things I have been doing since I was a child. Even though back then I was considered a rubbish collector, driving my mother crazy with my saving and reusing...not knowing then that I was recycling, which would one day be considered "being green- the new millennium chic!"  
I've always believed I was doing a good thing with my recycling however, there is a whole lot more I can do and **WILL DO!**

Thank you Stuart and Becky for sharing your time and this new & important information with us and especially, mahalo Sistah Rell! Your passion and legacy lives on!
